
European Master in Official Statistics - EMOS

Last update:06.03.2025

The European Master in Official Statistics (EMOS) is a network of Master programmes providing post-graduate education in the area of official statistics at the European level. EMOS is a joint project of universities and data producers in Europe. After two calls for interest, the network comprises over 32 programmes in 19 countries.

EMOS was set up to strengthen the collaboration within academia and producers of official statistics and help develop professionals able to work with European official data at different levels in the fast-changing production system of the 21st century. The EMOS Master degree is based on learning outcomes which familiarise the graduates with the system of official statistics, production models, statistical methods and dissemination.

Universities offering EMOS Master degrees collaborate actively with the national statistical institutes to reduce the gap between theory and practice. Pertinent topics for Master thesis, internship in the area of official statistic, EMOS workshops and webinars offer a relevant mix of skills and knowledge for tomorrow's official statisticians.
