Spring holidays, even without snow in March, caused higher visit rate in hotels and guesthouses than a year ago in 6 out of 8 regions of the Slovak Republic

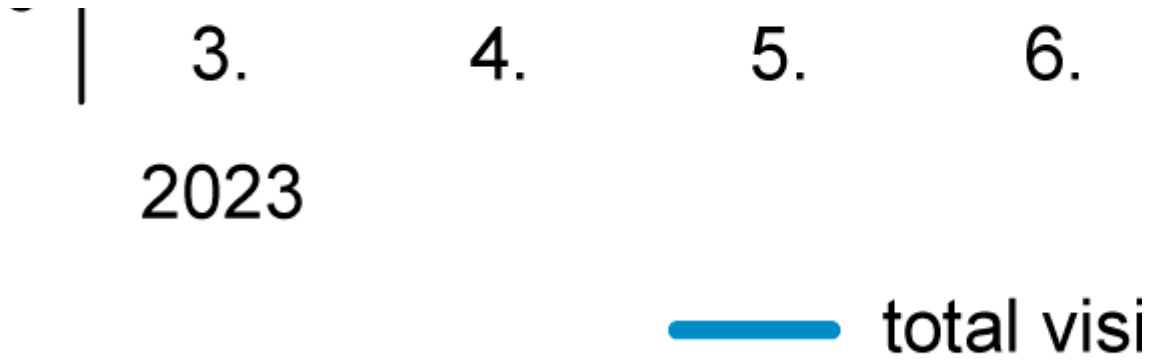

Despite the worse snow conditions, accommodation providers improved the number of visitors in March year-on-year, 6% of visitors were missing from the pre-pandemic values. Bratislavský kraj attracted the most guests. Prešovský kraj with the High Tatras prospered the most, which was the only one of the 8 regions with a higher number of domestic and foreign guests, not only year-on-year, but also compared to March 2019.

In March 2024, 410 000 people spent at least one night in hotels, guesthouses, spas and other accommodation establishments in Slovakia. The total visit rate of tourism accommodation establishments in Slovakia increased by 2% year-on-year. The spring holidays caused the return of the higher number of visitors almost to the pre-Covid level, accommodation providers were missing only less than 6%, i.e. 24 000 guests, from the March 2019 numbers.
