My Municipality in statistics

Posledná aktualizácia:27.06.2018 | Počet zobrazení:null

We introduce to you the Slovak municipalities in a new form. Selected statistical indicators for your municipality were enriched with a visual dimension. Through a simple, easily readable and attractive form we would like to present you some interesting figures from selected statistical domains available at the lowest territorial level.

Statistical indicators are shown in graphs. Besides the **choice of a territorial parameter** that allows the selection of any Slovak municipality, it is possible to monitor their development over the last 20 years.
The source data is stored in a single database **DATAcube.**, with a link located under the name of each graph.
The graph legends are interactive, able to hide and uncover individual available data series. The graphs can be printed or downloaded by clicking the button at the top right corner of each graph.

Application entry My Municipality in statistics.
